Internet Original

In 1962, the Internet is innovated by USA for military needs.

Then the Internet develops a lot and the world is connected as a whole except...

Prezi

Undeveloped Area

Although the satellite and remote sensing have given us a sight, the Internet is still unaccessible to the people there due to poverty of economy and education.

So what should we do?

Prezi

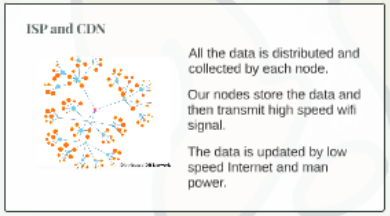
Universal Measures

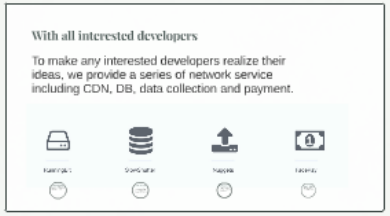
It costs too much to construct the base and optical fiber so neither government nor companies are willing to do it.

Prezi

Here comes Carriage!

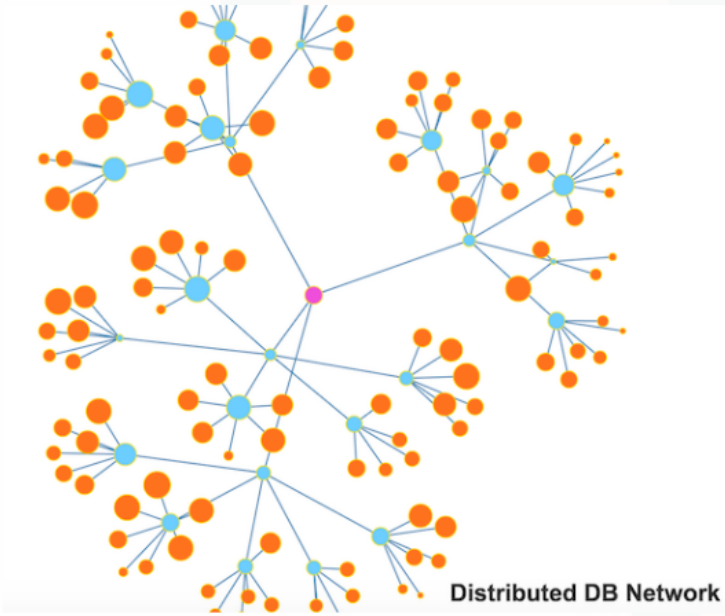
We deal with the problem by combining the high speed Internet, low speed network and manpower. Our technology can arrange nodes around the poor city and provides necessary LAN.





Prezi

ISP and CDN



All the data is distributed and collected by each node.

Our nodes store the data and then transmit high speed wifi signal.

The data is updated by low speed Internet and man power.

Prezi

With all interested developers

To make any interested developers realize their ideas, we provide a series of network service including CDN, DB, data collection and payment.

RunningBit

SlowShutter

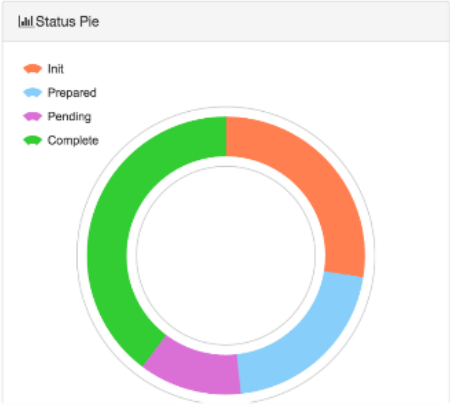
Nuggets

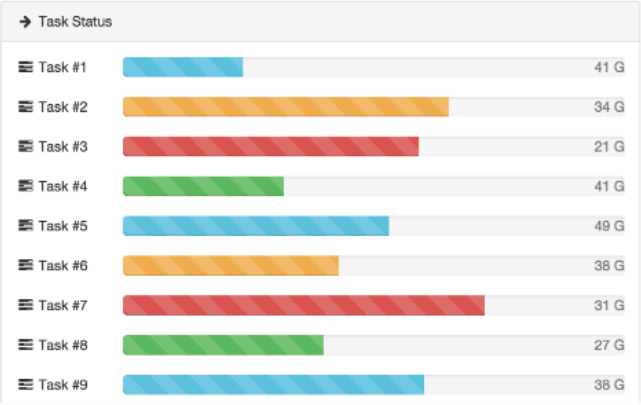
FacePay

Prezi

RunningBit SDK

RunningBit service distributes the content to all nodes deployed in the developing area and provides user`s access with a marvelous speed.





Prezi

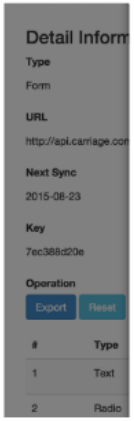
SlowShutter SDK

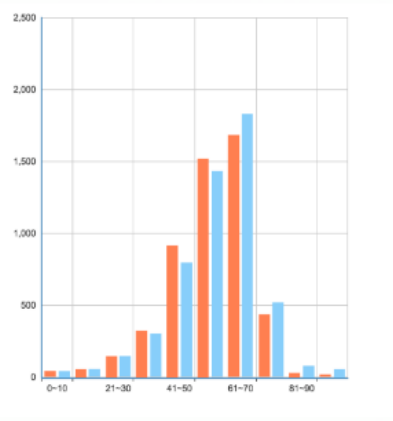
SlowShutter service provides reliable and slow-synchronization database, which performs distributions and storage states in the back-stage management.

Prezi

Nuggets SDK

Nuggets service plays an important role in the big data time. You can design your survey in the undeveloped area for commercial as well as research use.





Prezi

FacePay SDK

In terms of the frequent cash-use custom, FacePay service realizes the offline cash transaction and online check.

FacePay #3

Detail Information

Url	Pay Method
http://api.carriage.co	Cash Or Card
Key	**Sync Interval**
bbff457124	3 Days
Account	**Next Sync Day**
$ 668	2015-08-21
